

Electric Rotating Grippers

ERG2-15035 2-Finger

ERG is a rotating electric 2-finger parallel gripper that is equipped with two symmetrically parallel fingers.

Advantages

- Compact size
- Slim rectangular body with three installation positions for flexible mounting
- Grip control: force and position adjustment
- Adjustable rotation angle and torque
- Infinite rotation
- Grip feedback and part detection: gripper status can be read at the PLC/Controller and visualized on the unit via LED's
- Multiple communication modes: the gripper supports Modbus RTU protocol and IO mode control. Other protocols such as USB and ETHERNET can be implemented through a protocol converter.
- Grip actuation via embedded controller.
